

KERRWALL

INNOVATIVE SOLUTION
FOR BATHROOMS

KOLPA

COMPANY PRESENTATION

Our company, named after the river, in the place surrounded by wine-growing hills and birch forests, has proudly maintained one of the leading positions on the bathroom equipment market in Europe for the past five decades.

Development, innovation and trends are the cornerstones of our work. The uncompromising quality is the guarantee that gives our brands – the programs of Kolpasan premium bathroom equipment and Kerrock innovative composite material – the highest level of trust and reputation.

SUSTAINABILITY

"As proud owners of ISO 14001 environmental certificate, we are constantly looking for new ways to use sustainable raw materials. We are aware of the great importance of being socially responsible. Towards nature, our local environment and the society as such. We are committed to future generations through our innovative products and solutions, so we can create the biggest footprint of quality and the smallest footprint as regards the environment."

KERRWALL

BENEFITS AND SOLUTIONS

A SUSTAINABLE SOLUTION: Kerrwall is made of Kerrock, a high-quality and durable material.

SUITABLE FOR BATHROOMS IN PUBLIC AND INDIVIDUAL FACILITIES: Whether you need it for bathroom at home or in public facility, Kerrwall will meet your needs. It is suitable for prefabricated and timber construction.

U GROOVE: The joint of the sheets has inconspicuous edge as we use a U groove for sheet thicknesses of 6 and 9 mm.

COLOUR SCALE, SIZE AND SHAPE OF CUSTOM SHEETS: Kerrwall is available in different colours, patterns, and dimensions (full-size sheets), allowing you to tailor the solution to your preferences and requirements.

QUICK INSTALLATION: Kerrwall can be installed quickly and easily, without the need to demolish and dismantle walls in the case of renovation.

FULL-SIZE SHEETS: The sheet formats we use are 750 and 920mm wide with a height of 2550mm.

EASY CLEANING: Kerrwall is made of Kerrock material, which prevents accumulation of dirt and makes it easy to clean. Your bathroom will always be clean and shiny.

100% WATERPROOF: Kerrwall is designed to provide complete water protection, so your walls will be spotless even after long periods of use.

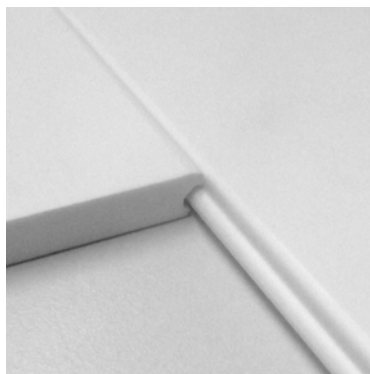

10-YEAR WARRANTY ON THE MATERIAL: Kerrwall ensures sustainable quality, durability, and satisfaction.

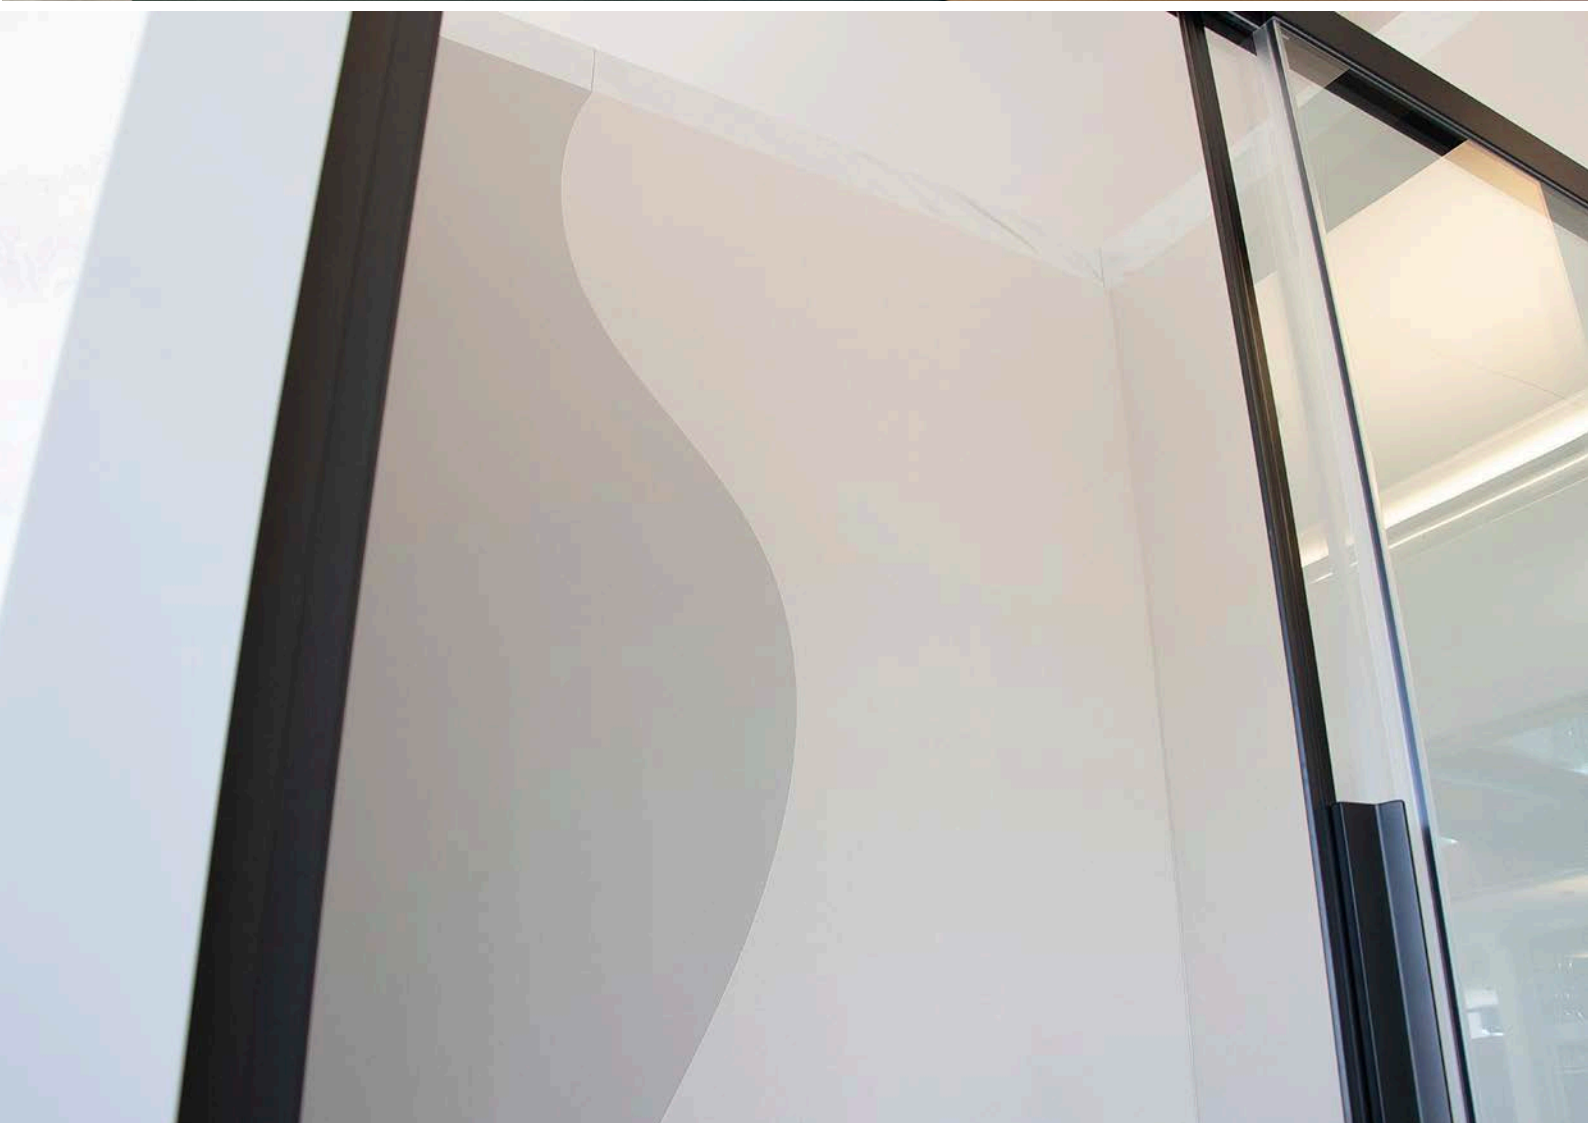

KERRWALL

INNOVATIVE SOLUTION FOR BATHROOMS

AN INNOVATIVE SOLUTION that gives you a modern and durable end product, an alternative to ceramic tiles.

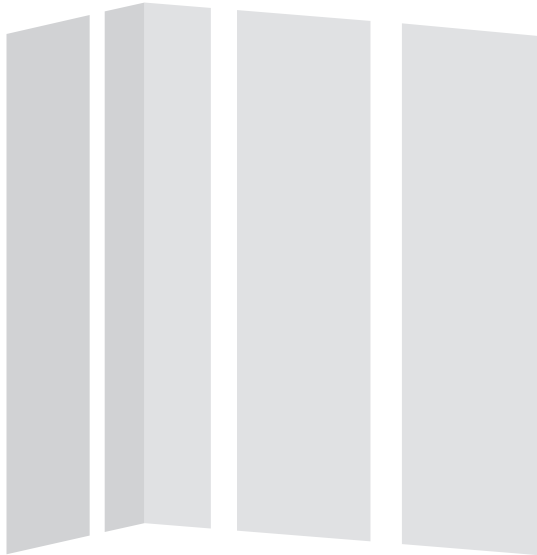

INNOVATIVE JOINTS: Kerrwall has a minimum number of joints, which are less visible and 100% watertight. The solution includes lining with grooves, which contributes to a uniform and elegant look of your bathroom.

KERRWALL

TECHNICAL POSSIBILITIES

TAILORED TO EACH BATHROOM:

Kerrwall solution is available in various colours, patterns and dimensions, allowing you to tailor it to your preferences and requirements.

Whatever the size or shape of your bathroom, Kerrwall provides a tailor-made solution.

This gives you more freedom in the design and planning of your renovated bathroom.

FAST USE: Kerrwall enables immediate use, just 24 hours after finishing.

CUSTOM SHEET DESIGN

DIFFERENT COMPOSITIONS:

Kerrwall can be assembled from different shaped sheets. The sheets can be curved, at 45° angles, or assembled as a mosaic.

With different sheet shapes, we can create something new, original, unique, or unusual. In this case, creativity is not limited to flat sheets.

KERRWALL/R

STANDARDISED LININGS FOR CLADDING OF SHOWER ROOM WALLS

We also offer a renovation solution where we have prefabricated sheets in different dimensions, in limited colours, which are quick and easy to install.

SPEED: Installing Kerrwall/r wall cladding is extremely quick and easy. Save your time and reduce the stress of the traditional removal process tiles and installing new ones. Ready for usage after just 24 hours.

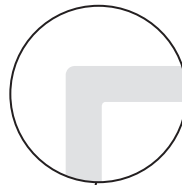

CONSTRUCTION: With Kerrwall/r, there is no need to remove the existing tiles. The cladding can be installed directly on top of the existing tiles, which means minimal mess and dirt during the renovation.

CLEANING: Joints are prone to accumulating dirt, dust, mould and bacteria, which can be difficult to remove. That is precisely the advantage of Kerrwall/r. It does not have many joints, which makes it easier to clean, and no special cleaning products or accessories are required.

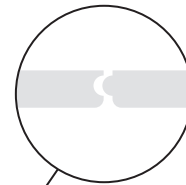

FLEXIBILITY: Kerrwall/r standardised linings are available in all standard dimensions that are offered on the shower tray market. This gives you more freedom in the design and planning of your renovated bathroom.

That is why Kerrwall/r is a perfect choice when it comes to a quick, clean and aesthetically pleasing bathroom renovation.
